REAL LINK AT A GLANCE

Security Management App

Real-Link Security provides you with real-time data on your guard operations. Our easy to use cost-effective app utilises cutting-edge NFC technology, giving you current details of guard locations, incident reports, alarm response and mobile patrols.

You have access to all of this information in real-time-no checking log cards or typing up information after the event. There is also no need for an expensive electronic clocking in and out system or a device that must be hard-wired to a network, as REAL-LINK can work from a mobile phone or a cost-effective Timebox.

NFC technology allows the collection of data, which is then transferred immediately to the server meaning that you can access the information from a web-based login.

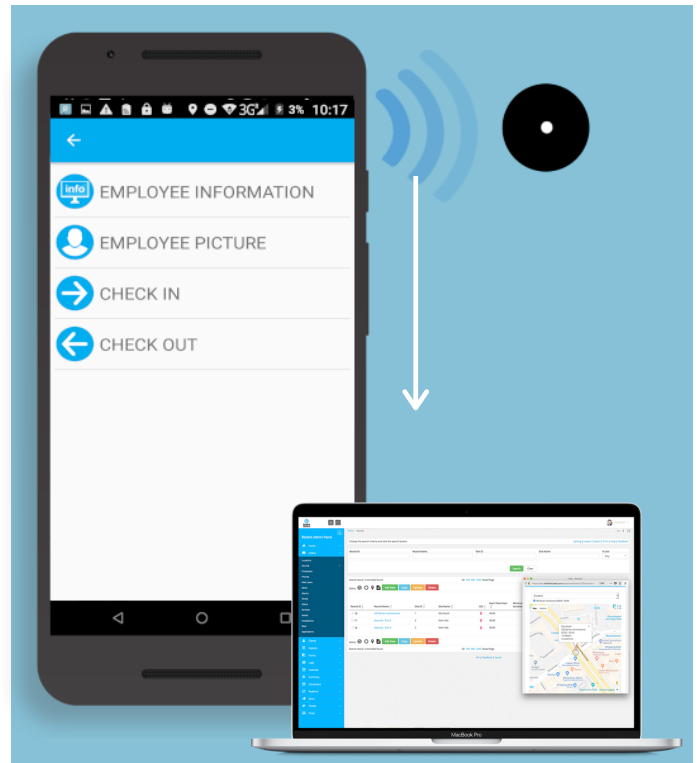

WHAT IS REAL-LINK?

RealLink is an app dedicated for monitoring, regular-checking and digital reporting.

It can be used in a variety of contexts including but not limited to incident reporting, area manager reporting, time and attendance, asset checks, toilet/fire doors/noise checks, lone worker rounds.

How does REAL-LINK work?

- Employee scans NFC tag with their Real-Link enabled mobile phone which transmits their name, location and the time in real-time, via the mobile network or Wi-Fi.
- Location specific data can be displayed on the phone for staff instructions or for capturing additional details such as specific checks that must be carried out.
- All the details are sent to the server in real time via the mobile network/WiFi
- The data is instantly available via cloud-based back office to enable monitoring of employees and their work. If you are on-the-go, automated reports and alerts are available via email and text message.

Features of REAL-LINK time and attendance system

- **Real-time proof** that patrols are being performed
- **Easy to use** solution that runs on a mobile phone
- Works on a **mobile network, Wi-Fi** or offline mode
- **Real-time incident reporting**-photos, video, text, lists etc.
- **Real-time alarms** of incidents by email or SMS
- **Cloud-based reports**
- **Automated reporting**: daily, weekly, monthly activity logs
- **GPS monitoring and tracking**
- Geo-fence locations, sites and employees
- **Live monitoring** of employees
- **Location-specific tasks** including alarm call-outs
- **Alerts** on missed tasks
- Supervisor site visits
- **Lone worker protection**- man down, SOS, active monitoring

Benefits of REAL-LINK time and attendance

- **Provide evidence** of patrols to your clients
- **Only mobile phone required**; no separate devices
- Deal with incidents **quickly** and **effectively**
- **Remove all paper forms** that need typing up, filling and at risk of being lost
- Cloud-based reports allow any-time access to data
- **Improved safety** of employees with **lone worker features**
- **Complete audit trail on your field operations**
- Higher **customer satisfaction** and higher **ROI**
- Help **win new contracts** by offering complete transparency to the customer
- Quick **ROI** by removing time spent on paperwork/reports, increased business due to satisfied customers

Keyholding & Alarm Response

Make keyholding and alarm response easy to manage and paper-free. Use Real-Link to display location specific questions and information relevant for each site.

Display key and alarm codes in a secure way, fill in a report about the call-out and inform the control room once you have finished and are leaving site.

REAL-LINK is easy to use, quick to deploy, and it can be fully customised for your operations, or delivered and used straight out of the box with our standard security set-up.

RealTime DC makes everything as easy as possible for you providing full support, set-up and training.

Affordable Integration

We understand that most businesses do not have unlimited money to spend on technology.

This is the reason that most of our software solutions are charged on a monthly or quarterly basis instead of a large upfront cost. We offer free support and guidance.

RealTime DC provides Real-Link services for the following:

*building sites,
outdoor events,
facility management companies,
schools, colleges, universities,
multiple-site businesses,
casual labouring,
bar, restaurants, nightclubs,
security companies and many more...*
