REAL LINK AT A GLANCE

Security Management App

Real-Link Security provides you with real-time data on your guard operations. Our easy to use cost-effective app utilises cutting-edge NFC technology, giving you current details of guard locations, incident reports, alarm response and mobile patrols.

You have access to all of this information in real-time-no checking log cards or typing up information after the event.

NFC technology allows the collection of data, which is then transferred immediately to the server meaning that you can access the information from a web-based login.
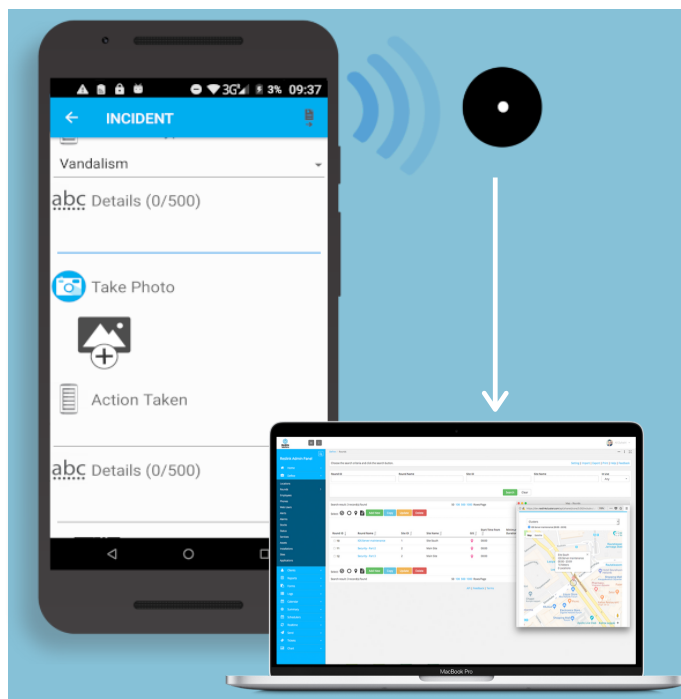

WHAT IS REAL-LINK?

RealLink is an app dedicated for monitoring, regular-checking and digital reporting.
It can be used in a variety of contexts including but not limited to incident reporting, area manager reporting, time and attendance, asset checks, toilet/fire doors/noise checks, lone worker rounds.

How does REAL-LINK work?

- Employee scans NFC tag with their Real-Link enabled mobile phone which transmits their name, location and the time in real-time, via the mobile network or Wi-Fi.

- Location specific data can be displayed on the phone for staff instructions or for capturing additional details such as specific checks that must be carried out.

- All the details are sent to the server in real time via the mobile network/WiFi

- The data is instantly available via cloud-based back office to enable monitoring of employees and their work. If you are on-the-go, automated reports and alerts are available via email and text message.

REAL-LINK Features

- **Real-time proof** that patrols are being performed
- **Easy to use** solution that runs on a **mobile phone**
- **Works on a mobile network, Wi-Fi or offline mode**

Keyholding & Alarm Response

Make keyholding and alarm response easy to manage and paper-free. Use Real-Link to display location specific questions and information relevant for each site.

Display key and alarm codes in a secure way, fill in a report about the call-out and inform the control room once you have finished and are leaving site.

Effective reporting

By using Real-Link you can deal with incidents quickly and effectively while ensuring that policies are adhered to all the times.

Real-Link is an ideal solution which helps you increase the general standard of upkeep and maintenance.

REAL-LINK is easy to use, quick to deploy, and it can be fully customised for your operations, or delivered and used straight out of the box with our standard security set-up.

RealTime DC makes everything as easy as possible for you providing full support, set-up and training.

Affordable Integration

We understand that most businesses do not have unlimited money to spend on technology.

This is the reason that most of our software solutions are charged on a monthly or quarterly basis instead of a large upfront cost. We offer free support and guidance.
